

Standards Compliance Statement

Outrigger Pads Australia | ABN 87 638 568 608

We supply UHMWPE outrigger pads to help distribute loads beneath outriggers and stabilisers.

We acknowledge our supplier duties under applicable state and territory work health and safety (WHS) or occupational health and safety (OHS) legislation, including supplying products that are safe, so far as reasonably practicable, and providing information for safe use.

Relevant Australian Standards

Reference	Equipment / scope
AS 1418.1:2021 AS 1418.5:2013	Cranes, hoists and winches - general requirements and mobile crane design.
AS 2550.1-2011 AS 2550.5:2016	Cranes, hoists and winches - general safe-use requirements and safe use of mobile cranes.
AS/NZS 1418.10:2025	Mobile elevating work platforms - design requirements.
AS 2550.10:2025	Mobile elevating work platforms - safe use.

Use the parts and editions applicable to your equipment and jurisdiction. These equipment design and safe-use references do not certify an individual pad load rating or a specific installation.

Codes of practice and safety guidance

Relevant guidance includes Safe Work Australia's model codes Managing risks of plant in the workplace and Elevating work platforms, and WorkSafe Queensland's Mobile crane Code of Practice 2024 (section 8.2, ground conditions and crane support). Check your local regulator for applicable codes.

Confirm suitability for each job

Pad size depends on equipment size and weight, the load on each outrigger and ground conditions. **You are responsible for confirming that the pads and complete support arrangement are suitable for each job.** Consult your equipment manufacturer or a qualified engineer to determine the appropriate pad size and load-bearing capacity for your specific crane or equipment model.

Before use

- **Confirm outrigger loads and support requirements** with the equipment manufacturer. Assess ground bearing capacity, fill, voids and underground services.
- **Provide stable, level support:** support the full pad, centre the outrigger foot and control slipping. Follow the equipment manufacturer's instructions and site safety procedures.
- **Inspect before each use.** Remove damaged pads from service. Seek competent advice if requirements or ground conditions are uncertain.

Read with our **Outrigger Pad Selection and Use Guide** and **Typical Properties of UHMWPE**. Nominal maximum loads are product selection guide figures for one outrigger in optimal conditions.
